INCREASED PRODUCTIVITY, ACCURACY, AND PROFITABILITY

CRL is committed to the success of the glazing contractor, and continues to make significant investments to develop the tools and services that allow you to take on new jobs while saving time and money. We are proud to introduce a new suite of design and estimating software that speaks directly to that commitment.

Storefronts Online® is a one-stop-shop that allows you to design and build commercial entrances, storefronts, and curtain walls faster than ever. This innovative, easy-to-use program expedites the bidding process, minimizes errors on estimates, and generates accurate quote packages in a matter of clicks, enabling you to quote more jobs in less time. The program stores your project's data including door information, glass sizes, hardware and material quantities and lengths, which then makes ordering, routine maintenance, and replacing parts directly through our extensive product selection an effortless motion. Storefronts Online® was built to strengthen your shop's technical abilities, help you build quality, safe architectural systems, and grow your business. It's like hiring a professional to do the work for you.

FEATURES AND ADVANTAGES

DEVELOPED BY GLAZING PROFESSIONALS, FOR GLAZING PROFESSIONALS

Storefronts Online® was developed in-house by our team of engineers, estimators, designers, project managers, and former installers who possess decades of experience in the glass and glazing industry.

YOUR JOB JUST GOT EASIER

Whereas other programs on the market force the user to manually insert products, the intuitive interface on Storefronts Online® starts with a simple layout of your storefront/curtain wall opening and progressively adds field conditions, hardware, and glazing options to effortlessly complete your project in minutes. It will then generate a detailed glass dimensions breakdown, glass installation chart, parts list, 3D enhanced drawings, and a complete set of fabrication and installation instructions with just a simple click. You can access Storefronts Online® at home, in the office, or on the job site via your PC, Mac, smartphone, or tablet

NEW UPDATES

- Now features full support for designing curtain wall systems in addition to all-glass and aluminum framed entrances and storefronts.
- Provides complete parts list, fabrication instructions, and instant access to a new built-in library of installation resources and guidelines.
- Determines all materials required and optimizes material yield across multiple openings.
- All-Glass module now includes sliding door systems.
- New “Cloning” feature allows you to design multiple entrances without having to reenter custom hardware.
- Now compatible with our innovative AccuFab Pro Tool—USGlass Magazine’s “Product of the Year”—which cuts fabrication time on installing horizontal shear blocks to vertical mullions by 75 percent or more. Watch the video at crlaurence.com/accufab

SHARP ATTENTION TO DETAIL

- The program keeps a complete record of all of your jobs, favorite systems, and specific configurations, including multiple elevations, while allowing you to set up personal product libraries. It features many easy-to-use templates or you can create your own.
- A built-in warning system will automatically identify and help correct any flaws in your design, including hardware limitations, to ensure structural integrity and code compliance. The Program will not allow you to forget/omit systems.
- Generates accurate quote packages and allows multiple quotes. Unlike other software, Storefronts Online® allows you to order product directly from the program.

COMPLETE SUPPORT AND TRAINING

CRL-U.S. Aluminum offers free, unlimited technical support and webinar sessions to train your team in no time.

As an industry leader for over a century, CRL-U.S. Aluminum has built a solid reputation based on innovative product design, installer-friendly systems, and excellent customer service. We collaborate with the commercial design and construction industry to produce monumental projects using our comprehensive offering of engineered products. Our wide range of architectural systems are carefully designed, engineered, and manufactured to satisfy the aesthetic value, structural integrity, performance requirements, and economic concerns of today's most demanding projects. All glazing systems are tested to the highest industry standards by certified independent testing laboratories.

This wealth of experience has produced an infrastructure with manufacturing and distribution capabilities strategically positioned throughout the North American market providing short lead times, and regional fabrication and technical support.
