SUBJECT: Performance testing in accordance with ASTM E 283-91 (Air Infiltration), ASTM E 331-93 (Water Resistance), ASTM E 330-90 (Uniform Load Deflection) and ASTM E 330-90 (Uniform Load Structural).

DESCRIPTION OF UNIT TESTED

Type: Aluminum Storefront

Series: "BG" System

Overall Size: 7'11-1/4" x 7'7-1/4"

Configuration: O.O

Glass: 1/4" tempered.

Glazing: One row of NP255 gasket at exterior face of each fixed lite, full perimeter. Silicone spacer (SP455) at interior face of all vertical member of each fixed lite and vinyl gasket (NP225) at interior face of all horizontal member of each fixed lite. Vertical butt joint between the two pairs of fixed lite is sealed with silicone and SP455 spacers sealed with silicone.

Weep Arrangement: Two 5/16" dia. weep holes in bottom of each fixed lite sill (total of 4 weeps in mock-up).

Sealant: Exterior joint between (BG569) jamb and (BG560) snap-in filler are sealed full length with sealant. End dams at each end of horizontal members are sealed at perimeter.

Other Features: Frame members are thermally broken.

Date Testing Started: January 5, 1996

Date Testing Completed: January 5, 1996
