Hydroslide Sliding Shower Door Kits were designed for full standing showers or above bathtubs. The Hydroslide System can accommodate a wide range of shower designs with fixed glass panels on either end, or both sides at 90 or 180 degrees. The Hydroslide System also accommodates the option of floor-to-near-ceiling glass panels with a sliding door.

180 Degree Hydroslide Sliding Shower Door Kits feature the latest European 'all-glass' look. Kits are available in either 60" or 84" (1524 or 2134 mm) widths. Installers can cut the width to size, and height is optional as long as the sliding door glass weighs less than 88 pounds (40 kg). The 180 Degree Wall-to-Wall Installation only requires the 180 Degree Standard Kit for the installation.

Cottage CK Series Sliders are unique in that they utilize clear polycarbonate side jambs instead of traditional metal side jambs, thus providing more of the popular ‘all-glass’ look. Bolt-Through Top Hangers allow immediate fabrication and installation, with no waiting for messy adhesive to dry. Cottage Series Kits come in Brite Anodized, Brite Gold Anodized, Brushed Nickel, and Oil Rubbed Bronze finishes, with other finishes available on special order.

The Clear Jamb System Changes How You View Frameless Sliding Shower Door Kits Because the Vertical Metal is eliminated

The top hung stock units include: Header, Top Hangers for 3/8” or 1/4” (10 or 6 mm) glass, Clear Polycarbonate Side Jambs, Bottom Sill, Back-to-Back Knob, 24” (610 mm) Towel Bar, Nylon Rollers, and Bottom Guide. Tempered glass and silicone sealant are supplied by the installer to complete the installation. Since all rollers are overhead, the Bottom Sill and Clear Side Jambs are uncluttered, making cleaning easy. Available in up to six stock sizes. Extrusions, Bottom Guides, Hardware Packages, and other accessories may be ordered separately as well (see next page).

SUITE EK SERIES
TWO DOOR BYPASS
FRAMELESS SLIDING
SHOWER DOOR KITS

• Designed for Use With 1/4" (6 mm) Tempered Glass
• Clamp-On Hanger Bracket Eliminates Glass Drilling
• Offered Only in Inline Units With Metal Side Jambs
• Low Profile 2-9/16" (65 mm) Header is Reversible So You Can Expose Either the Curved or Flat Side
• Custom Finish Units Also Available

KITS INCLUDE:

- One - Reversible Header
- One - Bottom Sill
- Two - Side Jambs
- Four - ‘No Drill’ Top Hangers
- One - Back-to-Back Knob (With Plastic Sleeve)
- One - Bottom Guide
- One - 24" (610 mm) Towel Bar

The Suite EK Series Frameless Sliding Shower Door Kit for 1/4" (6 mm) thick tempered safety glass provides an alternative design and mounting method to our Deluxe Cottage Series Sliders. The Hanger Bracket is a cost-reducing device, as it clamps directly onto the glass and eliminates the need for drilling holes (set screws only). The brackets allow for smooth, quiet operation and long service life at a lower cost.

FINISHES:

- Brite Anodized
- Brushed Nickel
- Oil Rubbed Bronze
- Brite Gold

SPECIFICATIONS:

Materials: Extrusions (Aluminum); Towel Bar (Brass Tubing); Knob (Solid Brass)
For Glass Thickness: 1/4" (6 mm) (Glass not included in Kit)
Glass Fabrication: Towel Bar – Two 1/2" (12 mm) Diameter Holes, 24" (610 mm) Center-to-Center; Knob – One 1/2" (12 mm) Diameter Hole

Maximum Recommended Size:
60" W x 72" H (1.52 m x 1.83 m)

The specially designed Header is only 2-9/16" (65 mm) tall. This reduces the visibility of the top metal, and allows more of the frameless, ‘all-glass’ look. It is reversible so the customer has the choice of using the gently curved side, or the flat side with top and bottom edge bevels.

The Suite EK Series is available exclusively with metal side jambs, does not offer the clear jamb system, and is available only for inline units. Kits with fixed panels are not available.

Two popular stock sizes are available: 60" W x 60" H (1.52 m x 1.52 m) and 60" W x 72" H (1.52 m x 1.83 m). The Suite EK Series comes in four popular finishes. Custom finishes are available upon request. Glass is not included in any EK Series Kit.

CLEAR SPACE™
TUB AND SHOWER ENCLOSURE SYSTEM

- Produces Large Opening While Utilizing Minimal Use of Floor Space
- Natural Feeling Elliptical Door Swing Motion
- Self-Closing and Self-Opening for Final 20 Degrees of Door Travel
- An Ideal Choice for Enclosures Used by Physically Challenged Individuals
- Can Also Be Used in 90 Degree and 135 Degree Fixed Panel Configurations

FEATURES AND BENEFITS:
- The perfect companion for assisting physically challenged individuals
- Produces large openings with minimal use of floor space
- Natural feeling elliptical door swing motion that does not move excessively towards the wheelchair
- Doors can be installed at both sides of an opening
- Can be configured with a pair of doors or with a fixed lite opposite the shower head
- Self-closing, self-opening for final 20 degrees of door swing
- Top Door Guide automatically hides and is unobtrusive at only 1-1/4" (32 mm) tall
- Many fixed lite configurations are compatible, like the ever popular 90 degree return and 135 degree neo angle
- Door swings inwardly with a normal pivoting action when a doorway jamb/stop is not used
- Compatible with bathtubs, raised curbs and flush floors
- Available optional header (call for details)

The NEW CLEAR SPACE™ is a state-of-the-art shower and bath enclosure system that is as functional as it is beautiful. An industry first elliptical door swing that gets out of the way, creating an open floor space on both sides of the enclosure! Large openings up to 72" (1829 mm) wide can result (based on a double door scenario), as the door projects only 10-1/2" (267 mm) into the enclosure, and 10-1/2"-16-1/2" (267-419 mm) out from the enclosure, avoiding sinks, toilets, and shower valves in the open floor space. Natural pivot door operation enhances the user experience, producing door space efficiency, without a header! The Top Door Guide automatically rotates open against the interior wall when the door is operated. CLEAR SPACE™ is the perfect companion for assisting physically challenged individuals, because the distance that the door travels toward the wheel chair is drastically reduced, and this is very important when producing wide openings. Natural pivot door operation and assisted opening/closing further enhances ergonomics while assuring that the door stays put in both positions.

Complete kits contain two Wall Mount and two 180° Glass-to-Glass Hinges. For enclosures requiring three hinges, those hinges must be purchased separately.
The NEW Transpara™ Shower Door System offers a truly all-glass aesthetic by being able to handle large glass lites without the need for door hinges or vertical framing. This produces uninterrupted glass visuals that are further enhanced by sleek, low-profile door rails. Matching U-Channel (ordered separately, see below) on adjacent fixed panels maintains a continuous sightline across the entire enclosure.

Appearances can be deceiving; despite having minimal hardware, the thin frames come equipped with innovative performance features. They include a water management system that is integrated into the closing mechanism, and a four-component fitting that uses the weight of the door itself to close. The installer-friendly door comes factory pre-glazed, and requires only two screws to install the bottom pivot. With visible hardware being only 3/4” (19 mm) high, Transpara™ delivers the best in contemporary design.

CRL has expanded the popular Laguna Series Sliding Glass Door line to include optional “Softbrake” Kits and Double Top Roller Kits. In addition, all kits are now available in either Brushed Stainless or Polished Stainless Finishes, and our most popular kits come in Matte Black. The **NEW** “Softbrake” option, for wall mounted kits, provides a controlled, quiet closure and prevents the doors from “slamming” open or closed. The **NEW** finish option, and **NEW** Double Top Rollers give you a variety of aesthetically pleasing options to accommodate the most imaginative designers.

The Laguna Series Sliding Glass Door System can be installed on glass partitions or directly to the side of a sufficiently reinforced wall. The adjustable Top Rollers make final adjustments quick and easy, without the need to remove the door. Their smooth operation and solid stainless steel construction minimizes maintenance issues.

CRL provides you with all the glass attachment fasteners for either flush mounting (requiring a countersunk hole), or surface mounting (requiring a straight hole). The glass attachment fasteners accommodate either 3/8” or 1/2” (10 or 12 mm) tempered glass and can easily be secured using our Cat. No. SW19 or LSSW1 Spanner Head Wrenches.

Standardized sets allow you to make planning and purchasing quick and easy for basic installations. We offer a wide variety of kits for Wall Mounting or Glass Mounting. We also offer an Adapter Kit, Cat. No. LSWMADT, to convert these Laguna Kits for use with wood doors.

CRL CLEAR VIEW™ MIRROR DEFOGGERS

- Enjoy the Clarity of a Mirror That Automatically Defogs
- Fast, Simple, and Cost Efficient Installation
- U.L. Approved

CRL Clear View™ Mirror Defoggers are specially designed thin heating elements that are adhered to the back of mirrors, gently raising their temperature just enough to keep the mirror dry and clear in high humidity conditions. Custom sizes and 220 Volt models are available on special request. For additional information, contact CRL Technical Sales at (800) 421-6144 in the U.S., (877) 421-6144 in Canada, or (323) 588-1281 International, and ask for Ext. 7700. You can also send an e-mail to glazing@crlaurence.com.
